## The Weather Site

Author: Ronald Flores Student

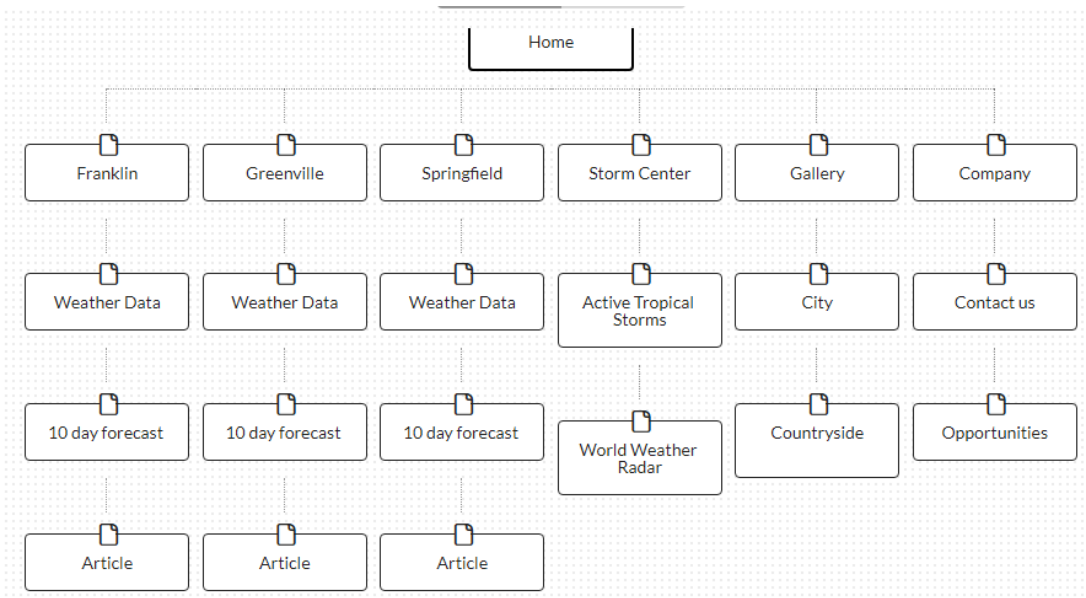

### Site Purpose

The purpose of this website is to inform the user about the type of weather in each city that wants to visit, also giving a forecast so that the user knows how the weather will be for the week. In addition this web page will show articles of the city to visit so that the user is updated with respect to what happens in that place

### Target Audience

This website can be used by someone who is looking to find out about the weather. This can be used by someone who has the mobile phone weather app. The people who mainly use this service are people who are booking holidays to check the weather in a different place. It is also used by someone who wants to go on a fun day out.

### Site Map
